# 2024年全国硕士研究生入学统一考试英语(一)试题及答案 Section I Use of English

#### **Directions:**

Read the following text.Choose the best word(s)for each numbered blank and mark A,B,C or D on the ANSWER SHEET.(10 points)

There's nothing more welcoming than a door opening for you. \_\_\_\_\_ the need to be touched to open or close, automatic doors are essential in 2\_\_\_\_\_ disabled access to buildings and helping provide general 3\_\_\_\_\_ to commercial buildings.

Self-sliding doors began to emerge as a commercial product in 1960 after being invented six years  $\underline{4}$  by Americans Dee Horton and Lew Hewitl.They  $\underline{5}$  as a novelty feature, but as their use has grown, their  $\underline{6}$  have extended within our technologically advanced world. Particularly  $\underline{7}$  in busy locations or during times of emergency, the doors  $\underline{8}$  crowd management by reducing the obstacles put in people's way.

<u>9</u> making access both in and out of buildings easier for people,the difference in the way many of these doors open helps reduce the total area <u>10</u> by them. Automatic doors often open to the side, with the panels sliding across one another. Replacing swing doors, these <u>11</u> smaller buildings to maximise the usable space inside without having to <u>12</u> the way for a large, sticking-out door. There are many different types of automatic door, with each <u>13</u> specific signals to tell them when to open. <u>14</u> these methods different main <u>15</u> remain the same.

Each automatic door system <u>16</u> the light, sound weight or movement in their vicinity as a signal to open. Sensor types are chosen to <u>17</u> the different environments they are needed in. <u>18</u> , a busy street might not <u>19</u> a motion-sensored door, as it would constantly be opening for passers-by. A pressure sensitive mat would be more <u>20</u> to limit the surveyed area.

## Section II Reading Comprehension

## Part A

#### **Directions:**

Read the following four texts.Answer the questions below each text by choosing A,B,C or D. Mark your answers on the ANSWER SHEET.(40 points)

## Text 1

Nearly 2000 years ago, as the Romans began to pull out of Scotland, they left behind a curious treasure: 10 tons of nails, nearly a million of the things. The nail hoard was discovered in 1960 in a four-metre-deep pit covered by two metres of gravel.

Why had the Romans buried a million nails? The likely explanation is that the withdrawal was rushed, and they didn't want the local Caledonians getting their hands on 10 tons of weapongrade iron. The Romans buried the nails so deep that they would not be discovered for almost two millennia.

Later civilisations would value the skilled blacksmith's labour in a nail even more than the raw material. As Roma Agrawal explains in her new delightful book Nuts and Bolts, early 17thcentury Virginians would sometimes burn down their homes if they were planning to relocate. This was an attempt to recover the valuable nails, which could be reused after sifting the ashes. The idea that one might burn down an entire house just to reclaim the nails underlines how scarce, costly and valuable the simple-seeming technology was.

The price of nails fell by 90%between the late 1700s and mid-1900s, as economist Daniel Sichel points out in a research paper. According to Sichel, although the falling price of nails was driven partly by cheaper iron and cheaper energy, most of the credit goes to nail manufactures who simply found more efficient ways to turn steel into nails.

Nails themselves have changed over the years,but Sichel studied them because they haven't changed much.Roman lamps and Roman chariots are very different from LED strips and sports cars,but Roman nails are still clearly nails.It would be absurd to try to track the changing price of sports cars since 1695,but to ask the same question of nails makes perfect sense.

I make no apology for being obsessed by a particular feature of these objects:their price.I am an economist, after all. After writing two books about the history of inventions, one thing I've learnt is that while it is the enchantingly sophisticated technologies that get all the hype, it's the

cheap technologies that change the world.

The Gutenberg printing press transformed civilisation not by changing the nature of writing but by changing its cost-and it would have achieved little without a parallel collapse in the price of surfaces to write on,thanks to an often-overlooked technology called paper.Solar panels had few niche uses until they became cheap;now they are transforming the global energy system.

21. The Romans buried the nails probably for the sake of \_\_\_\_\_\_ [A]saving them for future use [B]keeping them from rusting [C]letting them grow in value [D]hiding them from the locals

22. The example of early 17th-century Virginians is used to\_\_\_\_\_ [A]highlight the thriftiness of early American colonists [B]illustrate the high status of blacksmiths in that period [C]contrast the attitudes of different civilisations toward nails [D]show the preciousness ofnail-making technology at that time

23.What played the major role in lowering the price of nails after the late 1700s?[A]Increased productivity.[B]Wider use of new energies.[C]Fiercer market competition.

[D]Reduced cost ofraw materials.

24.It can be learned from Paragraph 5 that nails [A]have undergone many technological improvements [B]have remained basically the same since Roman times [C]are less studied than other everyday products [D]are one of the world's most significant inventions

25. Which of the following best summarises the last two paragraphs?
[A] Cheap technologies bring about revolutionary change.
[B] Technological innovation is integral to economic success.
[C] Technology defines people's understanding of the world.
[D] Sophisticated technologies develop from small inventions.

#### Text 2

Parenting tips obtained from hunter-gatherers in Africa may be the key to bringing up more contented children, researchers have suggested. The idea is based on studies of communities such as the Kung of Botswana, where each child is cared for by many adults. Kung children as young as four will help to look after younger ones and "baby-wearing", in which infants are carried in slings, is considered the norm.

According to Dr Nikhil Chaudhary, an evolutionary anthropologist at Cambridge University, these practices, Known as alloparenting, could lead to less anxiety for children and parents.

Dr Annie Swanepoel, a child psychiatrist, believes that there are ways to incorporate them into western life.In Germany, one scheme has paired an old people's home with a nursery. The residents help to look after the children, an arrangement akin to alloparenting. Another measure could be encouraging friendships between children indifferent school years to mirror the unsupervised mixed-age playgroups in hunter-gatherer communities.

In a paper published in the Journal of Child Psychology and Psychiatry, researchers said that the western nuclear family was a recent invention which family broke with evolutionary history. This abrupt shift to an "intensive mothering narrative", which suggests that mothers should manage childcare alone, was likely to have been harmful. "Such narratives can lead to maternal exhaustion and have dangerous consequences, "they wrote.

By contrast, in hunter-gatherer societies adults other than the parents can provide almost half of a child's care. One previous study looked at the Efé people of the Democratic Republic of Congo. It found that infants had an average of 14 alloparents a day by the time they were 18 weeks old and were passed between caregivers eight times an hour.

Chaudhary said that parents now had less childcare support from family and social networks than during most of humans'evolutionary history,but introducing additional caregivers could reduce stress and maternal depression,which could have a "knock-on" benefit to a child's wellbeing. An infant born to a hunter-gatherer society could have more than ten caregivers-this contrasts starkly to nursery settings in the UK where regulations call for a ratio of one carer to four children aged two to three.

While hunter-gatherer children learnt from observation and imitation in mixed-age playgroups, researchers said that western "instructive teaching", where pupils are asked to sit still, may contribute to conditions such as attention deficit hyperactivity disorder. Chaudhary said that Britain should explore the possibility that older siblings helping their parents "might also enhance their own social development."

26.According to the first two paragraph, alloparenting refers to the practice of \_\_\_\_\_\_\_ [A]sharing child care among community members [B]assigning babies to specific adult caregivers [C]teaching parenting details to older children [D]carrying infants around by their parent

27.The scheme in Germany is mentioned to illustrate \_\_\_\_\_\_ [A]an attempt to facilitate intergenerational communication [B]an approach to integrating alloparenting into western culture [C]the conventional parenting style in western culture [D]the differences between western African ways of living

28.According to Paragraph 4,the "intensive mothering narrative"\_\_\_\_\_\_
[A]alleviate parenting pressure
[B]considerate family relationships
[C]results in the child-centered family
[D]departs from the course of evolution

29.According to paragraph 6, what can we learn about nursery in the UK?[A]They tend to fall short of official requirements.[B]They have difficulty finding enough caregivers.[C]They ought to improve their carer-to-child ratio.[D]They should try to prevent parental depression.

30.Which of the following would be the best title ? [A]Instructive teaching:a dilemma for anxious parents [B]For a happier family,learn from the hunter-gatherers [C]Mix-aged playgroup,a better choice for lonely children [D]Tracing the history of parenting:from Africa to Europe

#### Text 3

Rutkowski is a Polish digital arist who uses classical painting styles to create dreamy fantasy landscapes.He has made illustrations for games such as Sony's Horizon Forbidden West, Ubisoft's Anno,Dungeons &Dragons,and Magic:The Gathering.And he's become a sudden hit in the new world of text-to-image AI generation.

His distinctive style is now one of the most commonly used prompts in the new open-source AI art generator Stable Diffusion, which was launched late last month. The tool, along with other popular image-generation AI models, allows anyone to create impressive images based on text prompts. For example, type in "Wizard with sword and a glowing orb of magic fire fights a fierce dragon Greg Rutkowski," and the system will produce something that looks not a million miles away from works in Rutkowski's style.

But these open-source programs are built by scraping images from the Internet,often without permission and proper attribution to artists.As a result,they are raising tricky questions about ethics and copyright.And artists like Rutkowski have had enough.

According to the website Lexica, which tracks over 10 million images and prompts generated by Stable Diffusion, Rutkowski's name has been used as a prompt around 93,000 times. Some of the world's most famous artists, such as Michelangelo, Pablo Picasso, and Leonardo da Vinci, brought up around 2,000 prompts each or less. Rutkowski's name also features as a prompt thousands offimes in the Discord of another text-to-image generator, Midjourney. Rutkowski was initially surprised but thought it might be a good way to reach new audiences. Then he tried searching for his name to see if a piece he had worked on had been published. The online search brought back work that had his name attached to it but wasn't his.

"It's been just a month. What about in a year? I probably won't be able to find my work out there because [the internet] will be flooded with AI art, "Rutkowski says." That's concerning."

"There is a coalition growing within artist industries to figure out how to tackle or mitigate this,"says Ortiz.The group is in its early days of mobilization,which could involve pushing for new policies or regulation.One suggestion is that AI models could be trained on images in the public domain, and AI companies could forge partnerships with museums and artists, Ortiz says.

31.What can be learned about Rutkowski from the first two paragraphs?

[A]He is enthusiastic about AI generation painting.

[B]He is popular with the users of an AI art generator.

[C]He attracts admiration from other illustrators. D]He specializes in classical painting digitalization.

32.The problem with open-source AI art generators is that they \_\_\_\_\_
[A]lack flexibility in responding to prompts
[B]produce artworks in unpredictable styles
[C]make unauthorized use of online images
[D]collect user information without consent

33.After searching online,Rutkowski found\_\_\_\_
[A]a unique way to reach audiences
[B]a new method to identify AI images
[C]AI-generated work bearing his name
[D]heated disputes regarding his copyright

34.According to Ortiz,AI companies are advised to\_[A]campaign for new policies or regulations
[B]offer their services to public institutions
[C]strengthen their relationships with AI users
[D]adopt a different strategy for AI model training

35.What is the text mainly about?[A]Arists'responses to Al art generation.[B]AI's expanded role in artistic creation.[C]Privacy issues in the application of Al.[D]Opposing views on AI development.

### Text 4

The miracle of the Chesapeake Bay lies not in its depths, but in the complexity of its natural construction, the interaction of fresh and saline water and the mix of land and water. The shallows provide homes for hundreds of species while storing floodwaters, filtering pollutants from water, and protecting nearby communities from potentially destructive storm surges.

All this was put at great risk late last month, when the US Supreme Court issued a ruling in an Idaho case that provides the EPA far less authority to regulate wetlands and waterways. Specifically,a 5-4 majority decided that wetlands protected by the EPA under it Clean Water Act authority must have a "continuous surface connection" to bodies of water. This narrowing of the regulatory scope was a victory for builders, mining operators and other commercial interests often at odds with environmental rules. And it carries "significant repercussions for water quality and flood control throughout the US," as Justice Brett Kavanaugh observed.

In Maryland, the good news is that there are many state laws in place that provide wetlands protections. But that's a very shortsighted view, particularly when it comes to the Chesapeake Bay. The reality is that water and the pollutants that so often come with it, don't respect state boundaries. The Chesapeake draws from a 64000-square-mile watershed that extends to Virginia, Pennsylvania, New York, West Virginia, the District of Columbia and Delaware. Will those

jurisdictions extend the same protections now denied under Sackett V.EPA?Perhaps some,but all? That seems unlikely.

It is too easy, and misleading, to see such court rulings as merely standing up for the rights of land owners when the consequences can be so dire for their neighbors. And it's reminder that they EPA's involvement in the Chesapeake Bay program has long been crucial as the means to transcend the influence of deep-pocketed special interests in neighboring states. Pennsylvania farmers, to use one telling example, aren't thinking about next year 's blue crab harvest in Maryland when they decide whether to spread animal waste on their fields, yet the runoff into nearby creeks can have enormous impacts downstream.

And so we would also call on state lawmakers from Richmond to Albany to consider reviewing their own wetlands protections and see for themselves the enormous stakes involved. We can't offer them a trip to the Chesapeake Bay model.It's been gone since the 1980s but perhaps a visit to Blackwater National Wildlife Refuge in Dorchester County where American bald eagles fly over tidal marshes so shallow you could not paddle a boat across them but teaming with aquatic life.It's worth the scenic drive.

36. The Chesapeake Bay is described in Paragraph 1 as

- [A]a value natural environment
- [B]a controversial conservation area
- [C]a place with commercial potential
- D]a headache for nearby communities

37.The U.S.Supreme Court's ruling in the Idaho case
[A]reinforces water pollution control
[B]weakens the EPA's regulatory power
[C]will end conflicts among local residents
[D]may face opposition from mining operators

38. How does the author feel about the future of the Chesapeake Bay?

[A]Worried.

[B]Puzzled.

[C]Relieved

[D]Encouraged

39.What can be inferred about the EPA's involvement in the Chesapeake Bay Program?[A]It has restored the balance among neighboring jurisdictions.[B]It has triggered a radical reform in commercial fisheries.[C]It has set a fine example of respecting state authorities.[D]It has ensured the coordination of protection efforts.

40.The author holds that the state lawmakers should \_\_\_\_\_\_ [A]be cautious about the influence of landowners [B]attach due importance to wetlands protections [C]recognize the need to expand wildlife refuges [D]improve the wellbeing of endangered species

#### Part B

#### **Directions:**

Read the following comments on a report about American museums returning artifacts to their countries of origin and a list of statements summarizing the comments. Choose the best statement from the list A-G for each numbered name (41—45). There are two extra choices which you do not need to use. Mark your answers on the ANSWER SHEET. (10 points)

## (41) Hannah

Simply, there are people in Nigeria who cannot travel to the Smithsonian Institution to see that part of their history and culture represented by the Benin Bronzes. These should be available to them as part of their cultural heritage and history and as a source of national pride. There is no good reason that these artifacts should be beyond the ordinary reach of the educational objectives or inspiration of the generations to which they were left. They serve no purpose in a museum in the United States or elsewhere except as curious objects. They cannot be compared to works of art produced for sale which can be passed from hand to hand and place to place by purchase.

#### (42)Buck

We know very exact reproductions of artwork can be and are regularly produced.Perhaps museums and governments might explore some role for the use of nearly exact reproductions as a means of resolving issues relating to returning works of art and antiquities.The context of any exhibit is more important to me than whether the object being displayed is 2,000 years old or 2 months old.In many cases the experts have a hard time agreeing on what is the real object and what is a forgery.Again,the story an exhibit is trying to tell is what matters.The monetary value of the objects on display is a distant second place in importance.

#### (43)Sara

When visiting the Baltimore Museum of Art,I came across a magnificent15th-century Chinese sculpture.It inspired me to learn more about the culture that it represented.Artifacts in museums have the power to inspire,and perhaps spark that need to learn and understand the nature of their creators.Having said that,I do feel that whatever artifacts find their way to public museums should,in fact,be sanctioned as having been obtained on loan,legally purchased,or obtained by treaty.Stealing artifacts from other peoples'cultures is obscene;it robs not only the physical objects,but the dignity and spirit of their creators.

## (44) Victor

Ancient art that is displaced in foreign countries should be returned... (缺失)

#### (45)Julia

To those of you in the comments section,by all means,who are having strong feeling about artifacts being removed from cities in the US and Britain,I would ask you to consider...(缺失)

[A]It is clear that countries of origin have never been compensated for stolen artifacts.[B]It is a flawed line of reasoning to argue against returning artifacts to their countries of origin.[C]Museum visitor can still learn as much from artifacts copies after the originals are returned.[D]Reproductions, even if perfectly made, cannot take the place of the authentic objects.[E]The real value of artifacts can only be recognized in their countries of origin rather than anywhere else

[F]Ways to get artifacts from other countries must be decent and lawful.

[G]Concern over security is no excuse for refusing to return artifacts to their countries of origin.

参考答案: 41. E 42.C 43.F 44.G 45.B

## Part C

#### **Directions:**

Read the following text carefully and then translate the underlined segments into Chinese.Your translation should be written clearly on the ANSWER SHEET.(10 points)

"Elephants never forget"---or so they say----and that piece of folklore seems to have some foundation.

The African savanna elephant also known as the African bush elephant, is distributed across 37 African countries. (46) They sometimes travel more than sixty miles to find food or water, and are very good at working out where other elephants are even when they are out of sight. Using tracking devices, researchers have shown that they have "remarkable spatial acuity", when finding their way to waterholes, they headed off in exactly the right direction, on one occasion from a distance of roughly thirty miles. What is more, they almost always seem to choose the nearest water hole. (47) The researchers are convinced that the elephants always know precisely where they are in relation to all the resources they need, and can therefore take shortcuts, as well as following familiar routes.

Although the cues used by African elephants for long-distance navigation are not yet understood, smell may well play a part.

Elephants are very choosy eaters,but until recently little was known about how they selected their food.(48) One possibility was that they merely used their eyes and tried out the plants they found,but that would probably result in a lot of wasted time and energy,not least because their eyesight is actually not very good.

(49) The volatile chemicals produced by plants can be carried a long way, and they are very characteristic: Each plant or tree has its own particular odor signature. What is more, they can be detected even when they are not actually visible. New research suggests that smell is a crucial factor in guiding elephants—and probably other herbivores —to the best food resources.

The researchers first established what kinds of plant the elephants preferred either to eat or avoid when foraging freely. They then set up a "food station" experiment, in which they gave elephants a series of choices based only on smell. (50) The experiment showed that elephants may well use smell to identify patches of trees that are good to eat, and secondly to assess the quality of the trees within each patch. Free-ranging elephants presumably also use this information to locate their preferred food.

## 参考译文:

(46)它们有时跋涉六十多英里寻找食物或水,并且非常善于寻找其他大象的位置——即

使它们不在视线范围内。

(47)研究人员相信,大象总是知道它们相对于所有所需资源的准确位置,因此可以走捷

径,并遵循熟悉的路线。

(48)有一种可能性是,大象只是利用视觉并尝试他们发现的植物,但这可能会浪费大量

的时间和精力,特别是因为它们视力实际上不是很好。

(49)植物产生的易挥发的化学物质可以被携带很长距离,而且它们是特异性的:每一种

## 植物或树都有自己独特的气味。

(50)实验表明,大象可以很好地利用嗅觉来识别适合食用的树丛,并评估每一片树丛中

树木的品质。

## Section III Writing

Part A

**51.Directions:** Read the following email from a student.Write a reply.

Dear Li Ming,

I've got a class assignment to make an oral report on an ancient Chinese scientist.I am not sure how to prepare for it.Could you give me some advice?Thanks for your help.

Yours, Paul

Write your letter in no less than 100 words. Don'tsign your own name at the end of the letter.Use "Li Ming"instead.

#### Dear Paul,

It's really a pleasure for me to hear from you. Hearing that you are struggling with how to prepare for an oral report on an ancient Chinese scientist, I am writing this email to ofer you some helpful suggestions.

Firstly,you need to select a prominent ancient Chinese scientist, such as Zhang Heng or Shen Kuo, and then conduct in-depth research on their lives, contributions, and impact on science and technology. Secondly, you should utilize reliable sources such as books, academic articles, and journals to gather accurate and detailed information. Lastly, it is advisable to organize your research findings into an outline, highlighting key aspects of the scientist's life and work, including their significant discoveries, inventions, and theories.

I hope you will find the information above practical.Feel free to contact me if you have any further questions

Yours truly, Li Ming

## Part B

#### 52.Directions:

Write an essay of 160-200 words based on the pictures below. In your essay, you should

1)describe the picture briefly,

2)interpret the implied meaning, and

3)give your comments.

Write your answer on the ANSWER SHEET.(20 points)

两张图:图一背景信息:在市民健身区两个人在跑,两个人在散步,有一个男生说:

"家门口新建的公园真不错。"图二为柱状图:标题为"某个城市公园数量",横坐标是

年份,分别是2020、2021、2022年,纵坐标分别是406、532、670。

#### 参考范文:

As is vividly depicted in the drawing on the left side, several people are doing exercise in the sports zone reserved for citizens while a man praises that the newly built park is fantastic. Meanwhile, emerging from the bar chart on the right side is the fact that the number of parks in a certain city has constantly increased from 406 in 2020 to 670 in 2022. The drawing and the chart above are intended to imply that great accomplishments have been made in the construction of public sports facilities

Why should this phenomenon take place?Generally,several factors may account for it.One of the contributing factors is that over the past four decades,the economy has been advancing at an unprecedented speed.With the tremendous improvement of living standards,people attach great importance to physical well-being and a healthy lifestyle,which produces greater demand for public sports facilities.Another potential cause is that many favorable policies have been implemented with the government's support, such as increasing investment in constructing sports facilities and parks.

To sum up, from the analysis above, we can draw a conclusion that residents'living environment has tremendously improved. It may be predicted that such a tendency will continue in the foreseeable future. 在职研究生招生信息网是以报考在职研究生为主题的官方网站,主要提供在职硕士、在职博士、MBA、EMBA等类别的在职研究生招生简章、报考条件、报名时间、报名入口等招生信息,是报考在职研究生综合门户网站。
